Re: Finney Crossing Solar Energy Policy Task Force

Dear Neighbors,

The Finney Crossing Master Residential Association Board is forming an ad hoc task force to create a solar energy policy for our community. The task force will review the Vermont Statute regarding Energy devices based on renewable resources (27 V.S.A. subchapter 544), look at any other available condo association policies regarding renewable energy generation, and prepare a policy for Board approval regarding renewable energy. This policy will be used by the Design Review Committee in reviewing applications that are requesting installation of renewal resource infrastructure.

We are looking for three to five homeowners to work with me to develop the policy. I would expect 2-4 meetings to complete the work with some work being done outside of meetings. My expectation is that we could have a policy ready for the Board's October meeting. Please respond with your interest to the email address below.

Sincerely,

G Miller
President for your FCMRA Board of Directors
