

INDUSTRIAL FABRICS

BLUE STREAK II (Model 629X)
Medium-to-high ply cutting of vinyl and woven upholstery materials, including canvas. Special configurations for fusible materials.

BRUTE (Model 627X)
Ideal for heavy-duty applications which require extra torque, such as dense weaves, non-wovens and vinyl.

Eastman®

INDUSTRIAL FABRICS

Whether it's canvas, vinyl, trilaminated, carpet, insulating material or rubber, Eastman manufactures a machine specifically for your industrial fabrics application.

LITTLE GIANT
(Model BB32)
An economical alternative for cutting heavier weight materials such as upholstery and industrial fabrics.

STANDARD SLITTER
(Model 548BK)
For low-to-medium ply cutting of panels and rectangular shapes.

CHICKADEE (Model D2)
The standard in the industry for industrial grade rotary shears. Single or low-ply cutting of wovens and vinyls. The D2 is the perfect upgrade to, or replacement for manual shears.

IN STOCK

BUZZARD
(Model BUZZ)
• Engineered with a 20,000 RPM pneumatic motor
• Opt. Pelican head designed for cutting lofted materials
• Optional swivel sharpener is equipped with a 30 degree ball tip shear plate for close edge rimming

Panel Cutting & Sheeting

The Eastman series of Falcon End Cutters provide the means to increase speed, efficiency and accuracy in your end cutting operation. The track guided Falcon enables the operator to make a fast, straight cut in virtually any material, no matter how tough; including quilted fabrics and foam up to 1-1/4" (3.20 cm) thick. Eastman end cutters are available in manually-operated or automatic configurations.

Falcon IV (Model FAL-4)

Auto Track Falcon II (Model ATFII)

Heavy Duty Falcon 548
(Model 548 FALHD)
