- David Stix, Stix Cattle Company

Rangelands and Rangeland Management

1 p.m. to 3 p.m.

Riparian Proper Functioning Condition

This year, the Rangelands portion of the Nevada Cattlemen's Update will focus on Riparian Proper Functioning Condition; often referred to as "PFC". Riparian PFC was designed to describe the condition of riparian areas (on the ground) and the associated process used to assess condition. PFC has been incorporated into rangeland planning and management in a number of ways, including, but not limited to the Rangeland Health Standards for Nevada. As a result, it receives a fair amount of attention.

- Dr. Paul Meiman, Associate Professor and Extension Specialist, Elko County and Department of Agriculture, Veterinary and Rangeland Sciences, University of Nevada, Reno
- Dr. Barry Perryman, Professor, Department of Agriculture, Veterinary & Rangeland Sciences, University of Nevada, Reno
- Brad Schultz, Professor and Extension Educator, Humboldt County, University of Nevada, Reno
