FEEDING DIRECTIONS

Feed 18% Lamb Grower to growing lambs from weaning to 45-60 lb body weight, depending on growth potential. Provide good quality forage and clean, fresh water at all times. Provide mineral supplementation as desired.

CAUTION: No copper compounds are added to this feed. However, naturally occurring copper in feed ingredients may combine to yield detectable copper levels. Care should be taken to minimize additional copper from forage, water or other feedstuffs available to sheep. This feed contains a source of non-protein nitrogen. The equivalent protein supplied by non-protein nitrogen should not exceed 1/3 of the crude protein of the total ration. Use only as directed. For sheep only. 26919
