

Distinguished Lecture

“Medicare Part D Medication Therapy Management (MTM): Program & Evidence Overview”

Melissa Castora-Binkley, PhD, MA, PMPS
Senior Director, Research
Pharmacy Quality Alliance

Melissa Castora-Binkley is the Senior Director of Research and leads the identification and execution of projects within the Pharmacy Quality Alliance's Quality and Innovation Research Center (QulRC). Dr. Castora-Binkley has over 20 years of combined experience in health research and policy, healthcare quality measure development and evaluation, and quality improvement. Previously, she worked on contracts with the Centers for Medicare & Medicaid Services to develop and evaluate quality measures. Additionally, she has experience in health services research, conducting observational studies focused on outcomes such as healthcare utilization and cost. She has conducted population health studies to determine risk factors affecting healthcare utilization, performed systematic literature reviews, and developed conceptual frameworks for guiding the direction of analyses and program development.
