FACULTY CHAMPIONS:

Rethinking Assessment in the Age of AI

WEBINAR FOR USF FACULTY

FREE | October 17 | 11:00 AM - 12:30 PM | Virtual *(via Teams)*

Generative AI is transforming how students learn, complete assignments, and engage with academic work in real-world settings. In response, USF faculty are reimagining assessment to prioritize authentic learning, measurable outcomes, and academic integrity.

Join us for a faculty session on rethinking assessment in the age of AI.

We'll spotlight approaches that

- Replace or supplement traditional assessments
- Strengthen academic integrity in the age of AI
- Focus on how students learn, not just what they know
- Encourage creativity, collaboration, reflection, and real-world application

Who should attend: Faculty who are experimenting with new approaches, curious about authentic assessment, or looking for strategies to address the challenges AI presents to academic integrity.

Take the next step: Join us for this interactive session and add your voice to USF's growing conversation on assessment, academic integrity, and innovation.

Your Faculty Champions

You'll hear examples from colleagues, learn how to share your own assessment strategies, and discover how this initiative will build a cross-campus collection of practices, events, and resources.
