

The School of Aging Studies Presents

"Multimodal Interventions to Mitigate Cognitive and Functional Impairment Associated with Alzheimer's Disease and Related Dementias (ADRD)"

A Colloquium by

**Priscilla A. Amofa-Ho,
M.A., Ph.D.**

**Clinical Post-Doctoral Scholar
Sleep & Neurodegenerative
Disorders**

**McCrae Sleep Research Lab
SHINE Science Center
College of Nursing, USF Health**

Wednesday, January 28th • 10:45 AM-12:00 PM • CBCS Atrium Lobby, MHC 1200

Dr. Priscilla A. Amofa-Ho is a neuropsychologist who completed her doctoral training at the University of Florida in Gainesville. Before earning her PhD, she worked at the Rush Alzheimer's Disease Research Center on various intervention studies aimed at reducing the risk of Alzheimer's disease dementia and other dementias. She has extensive training and experience working with individuals at risk of and with dementia. Her clinical and research interests include mild cognitive impairment (MCI), dementias, implementing interventions to prevent cognitive decline, and adapting interventions for underserved populations. She is currently a postdoctoral fellow at the University of South Florida (PI: Dr. Christina McCrae, PhD, DBSM, FSBSM, FAASM, director of the SHINE Science Center and Assistant Dean of Research), focusing on how sleep affects cognitive aging and neurodegenerative disorders.
