

# EDUCATIONAL ASSESSMENT & SCALE DEVELOPMENT

FALL 2026

MHS 6900 | CRN 91426

THURSDAY

12:30 PM - 3:15 PM

MHC 1703

This course offers graduate student researchers a comprehensive introduction to educational and psychological assessment, with examples drawn from language, literacy, mathematics, and intelligence.

Students will explore key measurement concepts and trace the evolution of assessment theory—from classical test theory to item response theory and computer adaptive testing—while examining essential issues of reliability, validity, and fairness in testing.
