

Help Build Florida's Dementia-Capable Behavioral Health Workforce

Share your expertise to improve training, services, and outcomes

Who Should Participate:

**Working professionals
to inform training
and workforce development**

We are seeking professionals in behavioral health or aging services who have experience supporting individuals living with dementia and their family caregivers. Your input will inform the development of a free online training series for behavioral health workers in Florida.

About the Study (IRB# 010334)

The University of South Florida is conducting a research study to better understand the training needs, challenges, and best practices of behavioral health workers serving individuals living with dementia, family caregivers, and those at higher risk of cognitive decline or dementia.

Are You a Working Professional in

- ▶ Behavioral health care services, support, and resources
- ▶ Aging, older adult, or dementia care services, programs, or advocacy organizations
- ▶ Substance use prevention, treatment, or recovery services
- ▶ Law enforcement, emergency medical services (EMS), or other first responder services
- ▶ Public health practice
- ▶ Living and working in Florida year-round?

What is Involved?

- ▶ Step 1: Complete a 15-minute online survey to determine eligibility
- ▶ Step 2: Participate in a 90-minute focus group via Zoom
- ▶ Receive a \$40 Amazon e-gift card for focus group participation

Why Your Input Matters

- ▶ Support better outcomes for people living with or at higher risk of dementia and their families
- ▶ Help identify training gaps, barriers, and workforce challenges in dementia-capable behavioral health services, support, and resources
- ▶ Contribute to the development of an online training series for behavioral health workers
