New Course: Introduction to Precalculus

- This course is designed for rising seniors who took Algebra 2 Trigonometry as juniors.
- This course is available to students who have a goal of taking a calculus course their senior year.
- The content will cover necessary precalculus topics required for a successful calculus experience.
- Students will work at their own pace and will be supported through online modules and zoom meetings.
- *This course requires an invitation from a student's current Algebra 2 Trigonometry teacher.*
