Terms we should all know....

- **Delta Variant** per the CDC as of August 6, 2021
  - The Delta variant causes more infections and spreads faster than original forms of SARS- CoV-2 (Covid -19)
  - The Delta variant is nearly twice as contagious as previous variants
  - Some data suggests that unvaccinated individuals can suffer more severe outcomes with Delta than earlier strains
  - While the impact on unvaccinated individuals is the primary concern, fully vaccinated people who contract the Delta variant CAN spread the virus and experience breakthrough infections
