Physicians, Home Health, Hospitals

NORTHSHORE CLINICAL LABS

Symptomatic Testing

SUMMARY:

Northshore Clinical Labs provides schools with a reserve supply of Abbott BinaxNow Rapid Antigen (point-of-care) and RT-PCR test kits. A Rapid Antigen test will be used to immediately diagnose an active COVID-19 infection (Results: 15 minutes). A RT-PCR test will confirm a positive result or rule-out a false-negative (Results: 24 hours). Northshore Clinical Labs will also provide a RT-PCR STAT option for for high-risk individuals (Results: 12 hours).

ACTION ITEMS:

1. Each facility must submit for a CLIA Certificate of Waiver. Under CLIA rules, persons who perform point-of-care tests must be appropriately trained to perform the test and must use appropriate PPE when handling samples.
   - More information on how to obtain a CLIA waiver can be found here.
   - CLIA Waiver application can be found here.
   - Submit CLIA Application and Questions to Illinois Department of Public Health.
   - If you need assistance obtaining a CLIA waiver, please contact CCDPH.
   - If you need help, here is the CMS CLIA Quick Start Guide
2. Northshore Clinical to provide onsite training to administer test: DATE XX/XX/XXXX

Process:

1. School administration confirms parent/legal guardian 'opt-in/opt-out' consent (Northshore Clinical Labs JOTFORM COVID-19 Testing Registration).
2. Administer Abbott BinaxNow Rapid Antigen Test & RT-PCR specimen collection.
3. Document 'Full Name | Date of Birth | Rapid Antigen Result' on the NSC form.
4. Package the NSC form with the RT-PCR specimen.
5. Contact Northshore Clinical Labs assign client service representative to coordinate RT-PCR specimen pickup at the end of the day.

NORTHSHORE CLINICAL LABS Pharmaceuticals

Quarantine | Test-to-Stay Protocol

SUMMARY:

Northshore Clinical Labs offers schools on-demand, on-site testing personnel support for groups (i.e. classroom) who may have been exposed to COVID-19 (24 hour notification). In addition, NSC will ensure Rapid Antigen & RT-PCR testing supplies are available to support quarantine and test-to-stay protocol (Day 1, Day 3, Day 5, Day 7).

ACTION ITEMS:

1. Each facility must submit for a CLIA Certificate of Waiver. Under CLIA rules, persons who perform point-of-care tests must be appropriately trained to perform the test and must use appropriate PPE when handling samples (see slide 6). Required for Rapid Antigen (POC) testing.
2. Review quarantine options:
    1. At home for 14 calendar days > return to school
    2. At home for 10 calendar days > RT-PCR test (negative) > return to school
    3. At home for 7 calendar days > RT-PCR test on day 6 or 7 (negative) > return to school
    4. Rapid Antigen and/or RT-PCR test (negative) Day 1, Day 3, Day 5, Day 7 > return to normal activity

Process:

1. School administration confirms parent/legal guardian 'opt-in/opt-out' consent (Northshore Clinical Labs JOTFORM COVID-19 Testing Registration).
2. All Rapid Antigen results must be communicated via email (same day) for IDPH state reporting.
3. Contact Northshore Clinical Labs assign client service representative to coordinate RT-PCR specimen pickup at the end of the day.

NORTHSHORE CLINICAL LABS Pharmaceuticals

Asymptomatic (Screening) Testing

SUMMARY:

Routine Asymptomatic (screening) testing will help identify cases, clusters and outbreaks early to mitigate secondary transmission among unvaccinated students, faculty, athletes and extracurricular participants. Furthermore, frequent testing will allow the school district and Cook/DuPage counties monitory community prevalence (and therefore risk assessment) to help evaluate and adjust prevention strategies.

The Northshore Clinical Labs team is comprised of trained administrative and clinical professionals to handle the testing process end-to-end with minimal school support. Testing

ACTION ITEMS:

1. Pre-launch meeting to identify and introduce key points of contact.
2. Discuss communication plan to families for 'opt-in/opt-out' consented testing.
3. Determine testing cadence by level of community.
4. Review execution plan (logistics, infrastructure, dates/times, etc.)
5. Results protocol, telehealth support and contact tracing procedures.

Process:

1. Obtain parent/legal guardian 'opt-in/opt-out' consent (Northshore Clinical Labs JOTFORM COVID-19 Testing Registration).
2. Review timeline and execution plan with all stakeholders
3. Schedule kick-off date.
