

WHY USE MEDICATION DROP-BOX?

Improve Public Health

Throwing unused or unwanted medications in the trash, or leaving them out, can lead to dangerous unintended exposure to people or animals. Treat and store both prescription and over-the-counter drugs like any other poison.

Protect the Environment

Studies have found traces of different pharmaceuticals in wastewater throughout the United States. Do NOT flush or pour medications down the a drain or sink.

Increases Public Safety

- In the US alone, 16.3 million people reported misusing prescriptions in the past 12 months. (1)
- 52 million Americans over the age of 12 have used prescription drugs non-medically in their lifetime. (2)
- In a survey, almost 50% of teens believe prescription drugs are much safer than illegal street drugs. (3)
- Nearly 9 out of 10 poisoning deaths are caused by drugs- both illicit and prescribed. (4)
- 54.2% of prescription drug users get them free from a friend or relative. (2)

Safe disposal of medications helps save lives!

- (1) National Center for Drug Abuse Statistics (2021)
- (2) National Institute on Drug Abuse
- (3) Foundation for a Drug-free World
- (4) Center for Lawful Access and Abuse Deterrence
