

WEDNESDAY 15 AUGUST

MAXIMISE PASTURE GAINS WITH NATIVE BACTERIA

The Leschenault Catchment Council (LCC) in association with Growise invite the community to a free information session to learn how the Bactivate Productive Pasture Program is delivering measurable beneficial outcomes for soil, feed and livestock, including:

<input checked="" type="checkbox"/> Improved feed quality	<input checked="" type="checkbox"/> Improved microbial soil balance
<input checked="" type="checkbox"/> Improved herd health	<input checked="" type="checkbox"/> Less soil compaction
<input checked="" type="checkbox"/> Improved milking rates	<input checked="" type="checkbox"/> More feed per hectare
<input checked="" type="checkbox"/> Improved protein	<input checked="" type="checkbox"/> Improved water use efficiency
<input checked="" type="checkbox"/> Improved butter milk fat	<input checked="" type="checkbox"/> Improved silage yields
<input checked="" type="checkbox"/> Potential reduction in feed costs	<input checked="" type="checkbox"/> Improved silage quality
<input checked="" type="checkbox"/> Potential improvement in stocking rates	<input checked="" type="checkbox"/> Better fertiliser utilisation

Underpinning it all is soil health. Bactivate is Australia's most scientifically-advanced microbial solution that replenishes challenged soils with a select mix of native bacteria and soil ameliorants to unlock paddock potential.

The guest speaker will be Glenn Perkins, National Manager of Bioactive Soil Solutions. Glenn is an Agronomist with a Master of Agribusiness and a passion for soil health, plant nutrition and farming efficiency.
