Vice President of Finance
Hospital Operations and Supply Chain

DATE: November 3, 2022

SUBJECT: Sofia Nadolski – Director of Vendor Management

As a result of recent reorganization efforts within our Finance Department, it is my distinct pleasure to announce that Sofia Nadolski has been appointed Director of Vendor Management for Baystate Health.

In her new role, Sofia will be responsible for developing Baystate's new Vendor Management Center of Excellence program. Key areas of focus will include contracting & vendor management on behalf of our BH Information & Technology (I&T) partners, while also creating more formalized processes to improve upon vendor contracting and relationship management for Baystate's purchased services activities.

Sofia began her career at Baystate Health in 2008 as Radiology PACS Administrator, and in 2010 she was promoted to Radiology IT Manager. She joined BH Finance's Supply Chain team in 2012, leveraging her strength in Process Improvement to help advance overall Supply Chain productivity, while also helping redesign and support a System-wide evidence-based Value Analysis structure and process. Sofia developed strong relationships while successfully negotiating agreements that resulted in major cost savings and improved vendor service levels. Since 2018, as BH Manager of Clinical & Financial Value Analysis, Sofia has worked on a variety of projects and strategy-related initiatives, as evidenced by the significant contributions she made within our Ambulatory Pharmacy (340B) program. In all, Sofia has played a lead role in strengthening internal and external alliances, while providing the research & intelligence needed to help make prudent business decisions at the Health System.

I am confident that Sofia's impressive performance & accomplishments to-date will lead to great success in her new role as Baystate's Director of Vendor Management.

Please join me in congratulating Sofia on her new role.
