

WE'RE ALL IN THIS TOGETHER

As we start the journey of a new school year together, there are SIMPLE and EFFECTIVE steps we can all take to safeguard the health and well-being of our community. With your commitment to taking these precautions, we can ensure that our children will continue to enjoy in-person learning with their friends and teachers.

*This is a living document and subject to change.

WHEN TO STAY HOME:

Before leaving home, take your child's temperature. If they have a fever of 100.4 or above, they should remain at home.

If your child is experiencing any of the symptoms below, please keep them home and contact your medical care provider.

- Contact with a person with symptoms of COVID-19
- New loss of taste or smell
- Shortness of breath or difficulty breathing
- Onset of new cough
- Fever or chills
- Fatigue
- Muscle or body aches
- Headache
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea

In Addition, please ask yourself these questions:

Have you travelled on public transport (most specifically airplanes) in the last 10 days?

Have you hosted or attended a gathering outside of your immediate household?

Do you have guests staying at your house who do not regularly live with you?

Are you staying at a place with friends or family outside of your immediate household?

Has anyone in your household been exposed or tested positive for Covid?

If you answer 'yes' to any of the questions, please plan to quarantine for 14 days from the date of the event.
