Measures:

Gas earthquake valve; water heater straps, grab bars/handrails, smoke/carbon monoxide detectors; moisture-proofing & draft sealing.

Does your home need safety repairs or improvements?

Rebuilding Together's **Safe and Healthy Homes** program helps make homes safer and more resilient. Our teams of volunteers and skilled professional contractors can assess your home for many safety measures, and can help make improvements that can save lives.

Our projects are designed to be completed in only a few days. The average value of materials and services is about \$30,000, including the cost of permits where applicable. **There is no cost to qualified homeowners in our target cities.**
