

Getting Ready to Use Zoom

If you don't already have Zoom installed on your computer or tablet, please try to do so before the meeting. If you have any trouble with installation, please email info@ashbyvillage.org and we will try to get someone from our tech team to help you. It would be wonderful for as many of us as possible to join via video so we can see each other. Here are the instructions for how to join and/or install.

HOW TO JOIN THE ZOOM PRACTICE MEETING ON THURSDAY, APRIL 2ND AT 3 PM

Easiest: PHONE

1. Dial: 1-669-900-9128
2. Meeting ID: 190 580 655
3. You may then be asked for a participant ID, just hit pound (#).

Better, but more complicated: VIDEO LINK

<https://zoom.us/j/190580655>

If you can take some time today to install their application on your computers it will make joining the meeting a bit smoother. You will be prompted to install this before the meeting regardless, but by installing it ahead of time it may take some of the stress away from connecting to the meeting.

Simply go here: https://zoom.us/download#client_4meeting and under "Zoom Client for Meetings" click on "Download", which will start the installation process on your computers.

If you can join by computer, especially if you have a video camera, it will allow us to see each other and connect visually as well as through audio, however we know that technology can be helpful but also stressful when trying to learn something new very quickly, so please choose whichever course is best for you right now!

We look forward to seeing you soon!
