

Lead Registry: Using PopHealth Analytics to Access Lead Data

In collaboration with DC Health, CRISP DC is leveraging District Lead Registry Data to support care coordination and improve patient outcomes. Participating organizations get seamless access through the Clinical Information tile in the CRISP DC portal, as well as through Lead Registry Reports in Population Health Analytics, which provide broader, actionable views of DC Health lead data. This tool delivers rapid visibility into lead exposure history, empowering teams to close care gaps, prioritize outreach, and coordinate care more effectively and confidently.

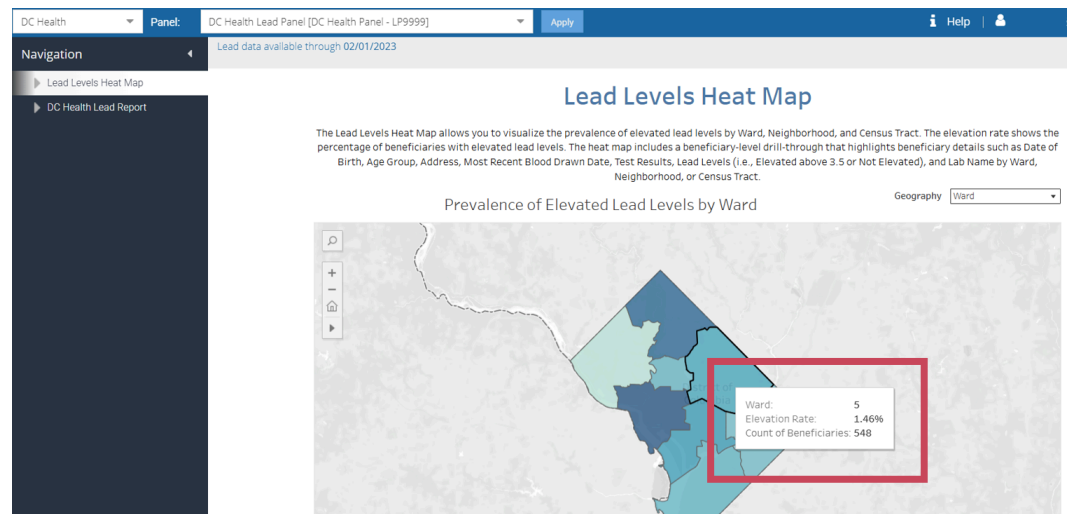

Purpose: Provide lead test results for an organization's patient population through beneficiary-level details, drill-down functionality, and a geographic heat map.

Features:

- Lead Levels Heat Map: visualizes the prevalence of elevated lead levels across the District
- Drill down capabilities on beneficiary details
- Customizable filters based on patient population demographics and chronic conditions and outreach summary
- Editable outreach fields that improve care coordination and communication across organizations

How to use:

1. Log in to CRISP DC ->
Click on PopHealth
2. Navigate to Care Gap Tracking Service
3. Choose from the Navigation Pane
 - View Lead Levels Heat Map
 - View Lead Report

Additional Questions?

Contact the DC Outreach team [via email](#) or visit the [Lead Registry landing page](#) for additional information, training resources, and support.

Beneficiary Details of Ward - 5												
Patient Name	Date of Birth	Age Group	Blood Drawn Date	Lead Level	Results	Lab Name	Street	State	City	Zip
