

Is Calcium Buildup Hurting Your Heart?

Calcified plaque within the walls of the coronary arteries

When calcium builds up in your arteries and heart, it can lead to or worsen coronary heart disease and your chance of a heart attack. If you have a history of heart disease, diabetes or smoking, high heart calcium levels can put you at risk.

During February Heart Month, you can get a **calcium scoring CT scan (heart scan)** for just **\$50*** at Memorial Cardiac and Vascular Institute. All you need is a prescription from your primary care physician.

To request an appointment, visit [MHS.net/HeartScan](https://mhs.net/HeartScan) or call 954-844-2040 to take advantage of this special \$50* offer.

Memorial
Cardiac and Vascular Institute

*Offer valid from February 1 – February 28, 2021. Check with your insurer to find out if your health plan covers the copay and/or deductible for a calcium scoring CT scan. If insurance or other healthcare payor does not cover the calcium scoring CT scan you can have the calcium scoring CT scan for the \$50 rate. Payment must be made in advance. Price includes the performance and interpretation of the exam. Patients must have a prescription for the procedure.

The invoiced amount may constitute a net discount. If patient is a Medicare or other federal healthcare program beneficiary, patient may be obligated to report this discount to the program upon request. The patient and any other person responsible for payment has the right to refuse to pay, cancel payment or be reimbursed for payment for any other service, examination, or treatment that is performed as a result of and within 72 hours of responding to this advertisement for the discounted fee, or reduced fee service, examination, or treatment. Other conditions may apply.
