

Join Michigan Medicine as

Director of Maternal Fetal Medicine

The Role

The Department of Obstetrics and Gynecology is seeking a highly innovative and visionary leader to advance the clinical, research, and educational missions of the Maternal Fetal Medicine Program.

The Responsibilities

Support the Birth Center and promote high-quality, patient-centered, efficient and equitable care

Create and establish a unifying vision for the Division of Maternal Fetal Medicine

Ensure the success of the Maternal Fetal Medicine Fellowship and further high-risk OB education and programs across the institution

Enhance and support the only Fetal Surgery Program in MI, performing about 75 fetal procedures annually.

Lead the recruitment, retention and development of faculty and staff to achieve the program's vision

The Benefits

- A 5-year-old state of the art Children's and Women's Hospital with 4800 deliveries annually
- A vibrant OB/GYN department with:
 - A commitment to building a nationally prominent MFM division
 - A supportive culture which enhances the professional and academic potential of faculty and staff
 - A record of successful NIH funding
- A fertile environment for collaboration and research.
 - University of Michigan is ranked as the top collaborative environment in the US with outstanding Basic Sciences, Public Health, Engineering, Business, and Survey Research
 - Generous start-up package including endowed chair and research funds
- A city that values family life, education, healthy living, and culture – all within a 10-minute commute!
