CITY OF FORT LAUDERDALE

Please join us to learn about

Asset Based Community Development

as we work to reimagine collaboration with and for our community.

This is part of the City of Fort Lauderdale's Equity in Education Initiative. We invite residents and organizational stakeholders who want to collaborate in new ways to support children and families in our community.

Join us to lean about Asset Based Community Development and reimagine what our community might look like when organizations create space for authentic collaboration and power sharing.

This project is generously funded by Children's Services Council. The virtual training and visioning session will be facilitated by the FERN Collective.
