

Executive Director Position Profile

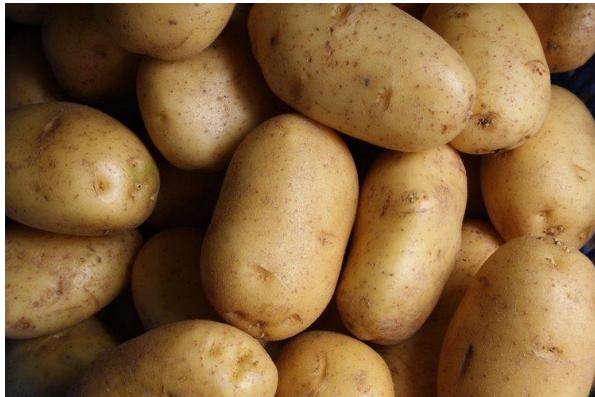

February 2023

Organization and Position Overview

The Food + Farm Exploration Center, in partnership with Farming for the Future Foundation, is a 501(c)(3) nonprofit organization with a mission to educate current and future generations about agricultural innovation and sustainability. The Exploration Center will promote agricultural literacy, increase the understanding of the origins of food, and deepen the relationship between farmers and consumers. Slated to open Summer 2023, the Center will be a state-of-the-art manifestation of the Foundation's educational mission. It will be a centralized place for people to come together on a journey into the world of modern agriculture, meet the people behind food production, build science and engineering skills, connect, play, and learn. It will be a teaching farm, a children's museum, a science center, and a community workshop all rolled into a tantalizing celebration of food and farming.

The Food + Farm Exploration Center will create common ground where people can learn more directly from the industry without taking away from the important work of feeding the growing population. It is important for people to know where their food comes from, and farmers are eager to share those stories. The Food + Farm Exploration Center is connecting with area education and agricultural experts to develop the most impactful programming possible. Located in Plover, a suburb of Stevens Point, Wisconsin, the Food + Farm Exploration Center will be the cornerstone of innovation and exploration as it relates to vegetables grown for human consumption. The Village of Plover is a welcoming community with a beautiful river and county parks, a wide variety of things to do, and a growing cosmopolitan area.

The Executive Director for the Food + Farm Exploration Center will have a proven track record, be committed to furthering the mission and vision to promote agricultural literacy and instill a greater appreciation of the origins of food and the people who grow it. The Executive Director is responsible for overseeing the administrative, programming, and strategic plan of the organization while looking toward opportunities for the future. The Executive Director will develop diverse and ongoing sources of financial support while managing and developing relationships with funders, sponsors, community and industry leaders.

Essential Responsibilities

- Advance the primary goal to promote agricultural literacy, to increase the understanding of the origins of our food, and to deepen the relationship between farmers and consumers.
- Utilize the Board's strategic vision to develop and implement a comprehensive business plan and educational programming and outreach to meet the vision.
- Oversee Directors for each pillar of the Center including Education, Marketing, Visitor Experience, Operations and Exhibits.
- Build a cross-functional, collaborative organizational culture.
- Build a collaborative staff to implement all the Center's efforts.
- Participate in an impactful partnership with the Center's Board of Directors.
- Work with the Board to develop, evaluate and refine guidelines, goals and strategic plans for all philanthropic and development funds and programs.
- Partner with organizational and state-wide community stakeholders to maximize the impact of the Center.
- Maintain transparent communication and relationships between board, staff, and key external stakeholders.
- Prepare, manage, and forecast the annual operating budget for the Center.
- Oversee all communication, marketing, and correspondence for the Center.
- Represent Center goals and values in local and state and industry-wide circles, and at community events and public presentations.
- Identify and facilitate partnerships opportunities to advance Center strategies.
