

XenApp 7 Migration

During the migration to XenApp 7, icons listed in your Storefront Favorites may disappear. It is recommended that users make a list of their Storefront Favorites so they know which applications will need to be added back.

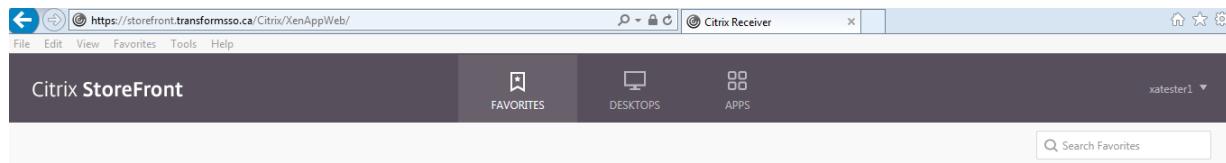

Current view (BEFORE Migration) of Favorites in Storefront:

- You may have applications that you have added to the Favorites tab in Storefront just like the image shown below.

- We encourage users to write down the name of the applications from your Favorites so you can search and add them back after the migration.

AFTER migration view of the Favorites in Storefront:

Go to Desktops or Apps, click on Details next to your choice and then select Add to Favorites.

Searching and Adding Applications in Favorites:

- Search for the application you would like to add back to your Favorites in the Apps tab, for example Outlook 2016.
- Click Details and then click Add to Favorites.
