## RE: SOM Climate Survey

Dear Friends and Colleagues,
A Climate Survey was conducted by the School of Medicine this past April. The survey measured faculty response to multiple topics, including career development opportunities, leadership support, and workplace environment. Respondents were asked to rate their level of agreement on a five point scale of 'Strongly Disagree' to 'Strongly Agree'. The findings were analyzed by the Office of Professionalism.

Of 936 faculty in the Department of Medicine, 368 (39\%) participated in the survey. Respondents included a cross-section of ranks (Professor - 21\%, Associate Professor - 28\%, Assistant Professor - 33\%, and Instructor - 16\%), and educational degrees (MD - 70\%, PhD - 25\%, and Other - 5\%). Very few respondents were from our affiliated institutions.

The department-specific questions yielded interesting results and I've shared the responses to the Department-specific questions with you in the attached document. My view is that the survey identified much to be proud of and some issues that need attention.

Our faculty responded that they were proud to be a member of our department, feel a positive sense of academic community and collaboration, and they respect and take pride in the ethical and professional standards promoted by the Department. These domains represent our core values and I'm pleased that our faculty appreciate and recognize the support and camaraderie of their peers and the Department. However, the survey results were helpful in identifying several areas for improvement:

- The Department and the Divisions need to create a more positive and inclusive climate for women, minorities, and faculty of color. Although we've made some progress (implemented a program to assure salary equity for rank and years in rank, increased under-represented minorities in housestaff training program ( $5 \% \rightarrow 14 \%$ ), and developed a research training program for underrepresented minority medical students), we need to do more. In this regard, I've recently made two key appointments: Sonia Flores as our Vice Chair for Diversity and Justice and Maggie Wierman to focus on enhancing the opportunities for women in the department. Through these appointments, I hope to have our faculty reflect the broadest possible community and address some of these perceived deficiencies. The work of Drs. Flores and Wierman and the subsequent changes we will implement will strengthen the culture of our Department and expand the opportunities for professional growth.
- Our faculty are appropriately concerned about career development. Over a year ago, I appointed Cara Wilson as the Vice Chair for Faculty Advancement. Dr. Wilson has developed an exceptional leadership training program that will begin this summer, and is expected to advance basic leadership skills throughout the department over the next couple of years. In addition, Dr. Wilson has a developed an on-boarding program that will start this fall for all new faculty and is working to improve the Department mentoring program to engage and support faculty across all divisions. Our faculty need a consistent approach to career development, mentorship, and access to essential tools for promotion. We will work on these important needs over the next year.
- The Department and the Divisions need to improve our communication. Over a year ago, we hired Lindsay Lennox to enhance the communication in the department. She has done a terrific job with the development of a regular departmental newsletter and a Facebook page that I post to every 1-2 weeks to stimulate interactive communication. Lindsay and I have also increased the email communication to our faculty, and we're in the process of upgrading our website. However, we need to provide greater access to critical information - where to go for help when stressed, burned out, or depressed; what to do when feeling intimidated or threatened; and when and how to report mistreatment or discrimination.

Lastly, the survey identified some problems that are specific to a few Divisions. My plan to review these issues with the specific Division heads, and while it may be uncomfortable I'm strongly encouraging each Division head to share all of the Division-specific information with their faculty so that a plan to address their problems can be mutually developed.

While some of the questions on the survey may not be pertinent to a Department as large as ours, I think it's important that we examine the results carefully and consider each of the concerns identified as addressing these concerns can only improve and strengthen our Divisions and Department. I welcome your thoughts and would be happy to meet to discuss suggestions or additional concerns you may have.

My very best wishes.
Sincerely,

David A. Schwartz, MD
Professor of Medicine and Immunology
Robert W. Schrier Chair of Medicine
University of Colorado School of Medicine

## Department of Medicine Survey Results

## Introduction

Due to its continued commitment to the development of the organization and it's staff, in particular improving the organizational culture, CU School of Medicine elected to administer an Employee Opinion survey .

The survey examines each employee's viewpoint on a variety of organizational topics including department, division, and Environment. The hope is to use the input to help guide actions related to improving the organizational culture and performance.

HR-Survey worked closely with CU School of Medicine to administer the survey questionnaire, collect responses, and report on the data.
The survey itself was launched for a two week period in April, 2016. During this period the survey was administered to employees via a web link on a voluntary basis. Employees were allowed time during their working day to complete the survey and due to the nature of the web link were able to respond on a confidential and honest basis as HR-Survey handled the administration of the survey responses.

## Summary of Findings

This survey measured employee agreement on a variety of topics and within several locations and service classifications. Agreement was measured using a response scale from Strongly Agree to Strongly Disagree. The survey also included several open-ended items to gather information in the form of suggestions and explanations.

1. 367 respondents completed the questionnaire. Please note however, that not every participant completed every item. Therefore, within these results you may find some items with a higher number of respondents (the ' $n$ '-size) than other items.
2. $66 \%$ of your employees either Agree or Strongly Agree that CU School of Medicine is a good place to work.
3. Participants were from several different locations and had a variety of years of service.

The table below indicates the number of participants from each Department.

## Department Count Percent

Medicine |  | 368 | $100.00 \%$ |
| :--- | :--- | :--- |

The table below indicates the number of participants from various faculty ranks.

| Faculty Rank | Count | Percent |
| :--- | ---: | ---: |
| Professor | 78 | $21.20 \%$ |
| Associate | 104 | $28.26 \%$ |
| Assistant | 122 | $33.15 \%$ |
| Instructor | 60 | $16.30 \%$ |
| Other | 4 | $1.09 \%$ |

The table below indicates the number of participants from various years of service.

| Years of Service | Count | Percent |
| :--- | ---: | ---: | :--- |
| Less than 1 year | 43 | $11.68 \%$ |
| 1 through 5 years | 104 | $28.26 \%$ |
| 6 through 10 years | 91 | $24.73 \%$ |
| 11 through 20 years | 86 | $23.37 \%$ |
| 21 or more years | 44 | $11.96 \%$ |

# Survey Data Interpretation <br> (please read) 

1. Data is presented in multiple formats.
a. Response Rates shows the numbers of responses for each of the five options both as an absolute number and as a percentage.
b. If there were less than 5 responses the data has been suppressed to insure anonymity.
2. Level of Agreement and Level of Agreement by Demographic - reports are presented with a bar graph showing percent agreement. This is calculated from all those responses to the question ONLY selecting Agree or Strongly Agree. Faculty Rank and Years of Service are shown separately.
3. Likert Scale - This is calculated from Strongly Disagree $=1$ point to Strongly Agree $=5$ points where the total for each question is then divided by the number of responses.
4. Comparison to CU SOM Overall (Level of Agreement) Reports comparing the department or division to the overall CU SOM score also show differences as a percent and as a Likert score.
5. Examples for Interpreting Level Of Agreement:
a. $100 \%$ means all respondents selected Agree or Strongly Agree - the Likert scale will be between 4 and 5 depending upon how many selected each of these.
b. $0 \%$ means no one selected Agree or Strongly Agree - the Likert scale will be between 1 and 3 depending upon how many selected Strongly Disagree, Disagree or Neither Agree nor Disagree
c. $50 \%$ means half of all respondents selected Agree or Strongly Agree - the Likert scale will be between 1 and 5 depending upon the selection
d. NOTE: The Likert scale may be different even if the $\%$ is the same.
6. For most questions, a higher $\%$ and higher Likert score is a more desirable result.
7. Some questions are inverted - a lower score means more disagreement such as the questions relating to mistreatment, discrimination, or stress and a negative result is more desirable. A "please note" message is shown in red text next to these questions. This note will explain how to interpret the scores for these items.
8. Text Analysis. The survey questionnaire contained several text boxes for written responses. A "text analysis" of each comment was performed and the comment assigned to a "category" (i.e., a topic of the comment) based on a ranking and prioritization of the words and phrases used in the comment. Though this report does not contain the text of the comments made, it does contain the results of the analysis of those comments. These results are shown as tables of "categories". The number (frequency) of comments in each category is shown.

## Affiliations

Participants were asked: "Are you affiliated with any other University of Colorado Center, Institution or Program outside your

| department?" |  |  |
| :--- | ---: | ---: |
| Has Affiliation <br> Outside of Main Department | Count |  |
| Percent | Color |  |
| No | 273 | $74 \%$ |
| Yes | 95 | $26 \%$ |

For participants that indicated an affiliation outside of their primary department, the affiliations by primary department are listed below. Numbers in square brackets next to the Affiliation indicate the number of participants from that department that have the Affiliation listed.

# Comment Analysis 2016 

## Introduction

The survey questionnaire contained several text boxes for written responses. A "text analysis" of each comment was performed and the comment assigned to a "topic" based on a ranking and prioritization of the words and phrases used in the comment. Though this report does not contain the text of the comments made, it does contain the results of the analysis of those comments. These results are shown as tables of "categories". The number (frequency) of comments in each category is shown.

## Words To Describe the Primary Department

Participants were asked to provide 3 words to describe their primary department. The lists below (sorted by department) show the frequency of each word used with the most frequent words shown at the beginning of each list. The numbers inside the brackets indicate the number of times the word was used. The word was only used once if no bracketed number is shown.

| Medicine |  |  |  |
| :---: | :---: | :---: | :---: |
| - [48] large | - [2] broad | - broad-based | - exciting |
| - [25] collegial | - [2] caring | - bureacratic | - focused |
| - [24] academic | - [2] centralized | - business | - forward mobility for mds only |
| - [21] collaborative | - [2] changing | - challenging | - forward-looking |
| - [21] supportive | - [2] cheap | - change-averse | - fosters research |
| - [20] innovative | - [2] closed | - clinical research | - fragmented |
| - [16] big | - [2] competent | - clinically productive | - frustrating |
| - [13] research | - [2] conservative | - clique | - funded |
| - [10] diverse | - [2] creative | - cliquish | - goal -oriented |
| - [9] excellence | - [2] energetic | - collaboration | - good clinical and research |
| - [9] inclusive | - [2] expansive | - collarorative | balance |
| - [8] clinical | - [2] forward thinking | - colleageal | - good environment |
| - [8] growing | - [2] helpful | - collegiality | - good-old boy |
| - [8] strong | - [2] heterogenous | - commitment | - greedy |
| - [7] ambitious | - [2] honest | - commitment to research | - growth |
| - [7] impersonal | - [2] huge | - communication-challenged | - growth potential |
| - [7] professional | - [2] improving | - compartmentalized | - heirarchical |
| - [6] disconnected | - [2] intelligent | - competency | - high quality |
| - [6] distant | - [2] isolated | - competing interests | - high standards |
| - [6] productive | - [2] knowledgeable | - comprehensive | - homogenous (white men) |
| - [6] research focused | - [2] leader | - conflicted | - humantarian |
| - [6] successful | - [2] male-dominated | - confused | - image |
| - [5] competitive | - [2] micromanagement | - confusing | - imposing |
| - [5] dedicated | - [2] outstanding | - convoluted | - in transition |
| - [5] excellent | - [2] patient centered | - data driven | - inclusion |
| - [5] friendly | - [2] positive | - decentralized | - income-obsessed |
| - [5] progressive | - [2] research driven | - diffuse | - incongruent |
| - [5] research-oriented | - [2] research oriented | - disinterested | - inconsistent |
| - [4] accomplished | - [2] scholarly | - disjointed | - indifferent |
| - [4] committed | - [2] scholarship | - disrespectful | - influencial |
| - [4] forward-thinking | - [2] segmented | - distinguished | - informative |
| - [4] good | - [2] specialty-driven | - diverse in interests | - innovation |
| - [4] hard-working | - | - diverse interests | - input |
| - [4] research-focused | - academic excellence | - diversity | - insular |
| - [4] respected | - academically diverse | - dollars | - integrity |
| - [3] balanced | - active | - dynamic | - intense |
| - [3] busy | - adequate | - easy to work with | - intentional |
| - [3] cutting edge | - advanced | - economics | - interactive |
| - [3] driven | - aloof | - effective | - inventive |
| - [3] evolving | - anonymous | - effort | - irrelevant |
| - [3] expanding | - approachable | - egotistical | - judgemental |
| - [3] fair | - arrogant | - engaged | - judgmental |
| - [3] hard working | - at will | - engaging | - kind |
| - [3] proactive | - average | - enriching | - large/huge |
| - [3] talented | - balkanized | - established | - less cohesive than 5 years ago |
| - [3] traditional | - biased towards lab research | - ethical | - litle concern for clinic |
| - [3] visionary | - breadth | - evidence based | - machine |
| - [2] biased | - breath | - excellet | - male |

| - massive | - organized | - respectable | - taxing |
| :---: | :---: | :---: | :---: |
| - md | - out of date | - respectful | - team work |
| - md centric | - out of touch | - responsible | - teamwork |
| - mediocre | - outside | - revenue | - tense |
| - men | - overreaching | - rigid | - thoughtful |
| - micromanaged | - overworked | - rising | - too big |
| - minimally involved | - parochial | - science based | - too broad |
| - misaligned | - paternalistic | - separated | - top notch clinical |
| - monetized | - patient care | - shared vision | - transitioning |
| - money obsessed | - patient-care focus | - short-sighted | - transparent |
| - monolithic | - perfectionistic | - siloed | - trying |
| - motivated | - pioneering | - slow-progressing | - uncaring |
| - multifaceted | - political | - slow-to-change | - uncollegial |
| - multiple prioriities | - potential | - small-minded | - underappreciated |
| - narcissistic | - practical | - smart | - undisciplined |
| - narrow | - pro-research mission | - specialist dominant | - unfair |
| - narrow-minded | - profitdriven | - specialist-oriented | - unfamiliar |
| - nice environment | - progressing | - square peg round hole | - unfocused |
| - no | - proud | - stagnant | - univ centric |
| - non cohesive | - provincial | - stale | - unorganized |
| - non-communicative | - quality | - stern | - unsupportive |
| - non-intrusive | - real | - stong | - unwieldy |
| - nonclinical | - recognized | - stressful | - variable |
| - not helpful | - regulated | - stringent | - vision |
| - not present | - reputable | - striving | - welcoming |
| - nurturing | - research centric | - strong leadership | - well-organized |
| - open | - research intensive | - subspecialty | - white |
| - opportunity | - research-driven | - success-driven | - working hard |
| - optimistic | - resident-oriented | - support | - world-class |

## What one improvement would you suggest to make your department a better place to work?

## Words To Describe the Secondary Department

Participants were asked to provide 3 words to describe their secondary department (if they had one). The participant typed the name of the department in a text field. The lists below (sorted by department).

Biochemistry Hospital Medicine Group

- collegial
- economics
- rigorous

## Biostatistics

- academic
- collaborative
- research

## CDB

- collaborative
- friendly
- research
- cohesive
- driven
- talented

## Immunology

- [2] innovative
- competitive
- leader
- narrow
- scientific
- siloed
- strong

Immunology/Microbiology

- ambitious
- collaborative
- research-focused

OBGYN

- diverse
- up and coming

Pathology

- diffuse
- disjointed
- large
- supportive

Pediatrics

- friendly
- innovative

## Pharmacology

- diffuse
- energetic
- good graduate students
- good seminar program
- open
- research based

Physiology

- growth

Physiology \& Biophysics

- accessable
- scholarly
- supportive

## Words To Describe their Center

Participants were asked to provide 3 words to describe their Center (if they had one). The participant typed the name of the Center in a text field. The lists below (sorted by Center).

| ACCORDS | Cancer Center | Center for Lungs and | CPC Clinical Research |
| :---: | :---: | :---: | :---: |
| - [2] collaborative | - [2] collaborative | Breathing | - organized |
| - [2] research | - [2] disorganized | - exciting | - striving for excellence |
| - constrained | - [2] supportive | - nascent | - unique |
| - evolving | - academic | - opportunity |  |
| - forward-looking | - bad leadership | - vague | Digestiv e Health Center at |
| - important | - chaotic |  | UCH |
| - insecure | - committed | Center for lungs and | - excellence |
| - isolated | - constructive | breathing | - growing |
| - pediatrics | - decentralized | - evolving | - oraganized |
| - supportive | - diffuse | - new |  |
|  | - disconnected | - virtual | Fibrosis Center |
| Anschutz Health and | - divided |  | - collaborative |
| Wellness Center | - emerging | Center for Women's Health | - exciting |
| - intellectually isolated | - excellence | - collegial | - new |
| - strong in research | - expanding | - focused |  |
| - struggling leadership | - expert | - supportive | Gates Stem Cell and |
| - unsettled | - fragmented |  | Regenerative Medicine |
|  | - great patient care | Center for Women's Health | Center |
| Cancer | - great patient outcomes | Research | - biomanufacturing facility |
| - academic | - inequality | - [2] supportive | - good colleagues |
| - accesssible | - invisible | - academic | - good seminars |
| - supportive | - isolated | - collaborative |  |
|  | - leaderless | - community | Health and Wellness |
| cancer cell biology | - poorly supported | - community-engaged | - aspirational |
| - male-dominated | - research focused | - empowering | - passionate |
| - miscommunication | - siloed | - engaging | - stressed |
| - non-inclusive | - strong | - excellence |  |
|  | - translational | - growing | Hemophilia and Thrombosis |
|  | - under appreciated | - interdisciplinary | Center |
|  | - underdeveloped |  | - collegial |
|  | - uneven | Center for Women's Heath research | - leader |

- weak
- welcoming

CCTSI

- "translational"
- clinical
- collaborative
- declining
- expensive
- large
- research
- supportive
- top-heavy
Center
- average
- disparate
- distant
- inclusive
- nurturing
- visionary

## Center on Aging

- research intensive
- under spaced
- underfunded

Center on Aging, Center for Women's Health Research

- collaborative
- virtual

Personalized Medicine

- complicated
- nascent
- not well known

Sickle Cell Center

- accomplished
- dedicated
- overextended

UCCC

- collaborative

## Colorado Prevention Center

- diversified
- excellent
- resource

University of Colorado Cancer Center

- diverse interests
- dynamic

What one improvement would you suggest to make your Center a better place to work?
