Please join NTCN and the Department of Developmental Services (DDS) for an informative session about the DDS mission, eligibility process, and available support services. This presentation will help begin building the bridge between school-based services and adult DDS services.

Designed for professionals, families, and individuals with disabilities, this program provides essential information about adult DDS supports. The session will be delivered in a personable, easy-to-understand format with the goal of strengthening relationships between DDS and the community they serve.

The Northeast Transition Collaborative Network (NTCN) connects families, educators, and providers in the Massachusetts Northeast Region to support youth transitioning from school to adult services. Our goal is to unify resources, offer trainings, and create a collaborative space to promote person-centered planning and successful outcomes.
