The Eastern San Joaquin Groundwater Authority is hosting a series of informational meetings, open to the public, to provide updates on local efforts to meet the state goals set forth in the Sustainable Groundwater Management Act (SGMA). We are developing a Groundwater Sustainability Plan that reflects local needs and conditions and prioritizes local control over water resources.

You're invited to attend the informational meeting on July 18. You will also get updates on the project and have the opportunity to ask questions and provide input about the Groundwater Sustainability Plan.
