American Academy of Psychiatry and the Law

A Tribute to Dr. Eugene Lee

Danielle B. Kushner, MD

A tremendous thank you to Dr. Eugene Lee, the friendly and welcoming forensic psychiatrist behind the camera who has been documenting our AAPL meetings for the past 10+ years. He focuses not just on the presidential addresses and leadership events, but also captures new and old members, highlighting presentations, posters, educational events, and social gatherings that connect the individuals of our organization. In bringing people together for a photo, his friendly demeanor introduces members to each other and radiates the welcoming spirit that AAPL strives for.

Dr. Lee completed his forensic fellowship at New York University in 2011 and shortly after graduation he moved to Arkansas with his now husband. Prior to his training in forensic psychiatry, he had also completed a public psychiatry fellowship in New York, which allowed him to be even more effective as a forensic psychiatrist. He is passionate about education of forensic and carceral psychiatry and improving forensic systems. He has developed a distinguished career as a correctional forensic psychiatrist in Arkansas. When not deep at work with organized psychiatry and clinical work, his two adorable twin girls keep him on his toes and are the stars of his home photography.

Thank you, Eugene, for your selfless service to AAPL over the years. You will be missed!
