All courses listed above **meet Carolina Core requirements (SCI)** and also fulfill various science requirements in a wide variety of majors across multiple colleges. Since these courses are **synchronous**, students will be expected to be available to meet with their instructors at the designated days and times listed in Self-Service Carolina. These courses are **not** self-paced/asynchronous.

Also, with the rollout of the new “studio physics” model in PHYS 211 and PHYS 211L this Fall, students needing one or both of these courses should consider these options being offered over the Summer.

Please feel free to distribute this information to students, faculty, fellow advisors, etc. If you have questions or concerns regarding these courses, do not hesitate to reach out!

Sincerely,

Sam Beals, Student Services Coordinator
