

1-20-2026

Dear Villa Monterey Residents,

The City of Scottsdale would like to provide an update regarding recent discussions with the Villa Monterey HOA Boards related to neighborhood trash collection.

At this time, the originally discussed container implementation is postponed. No changes to the current collection service will be made.

The recent meeting with VM HOA representatives was held to gather feedback and better understand resident concerns. Based on that feedback, the city has committed to continuing its evaluation and working collaboratively with the HOAs to explore potential solutions that consider neighborhood preferences, service expectations, and operational considerations.

As part of this broader evaluation, the city is also reviewing long-term collection modernization, which may include automated collection and standardized containers in the future. No decisions have been made for Villa Monterey, and there is no implementation timeline at this time. The city will continue engaging with HOA Boards and will share updates with residents as additional information becomes available.

Thank you for your patience and continued engagement.

Sincerely,
Gina Azima
Outreach Manager, City of Scottsdale
