

# Support CenteringPregnancy in Michigan

## What does CenteringPregnancy look like?

- Group setting allows for families to have greater engagement, learning, and self confidence
- Nearly eliminates the disparity in preterm birth rates between Black and white women
- 10x more time spent with their provider
- CenteringPregnancy has shown to improve a wide range of birth outcomes including lowering risk of preterm birth, reducing the incidence of low birth weight babies, and increasing breastfeeding rates

“I was **less scared** when I became a mother. I had the necessary tools and resources to not only help myself, but other mothers as well.”  
-Henry Ford Health’s WIN Network Participant

## How do we know CenteringPregnancy makes a difference?

44% reduction in risk  
of low birth weight

28% reduction  
in risk of NICU stay

33–47% lower risk  
of preterm birth

1. Prospective Randomized Clinical Trial, Ickovics, et al 2007 2. Retrospective cohort study Picklesimer, et al 2012

**We urge support for the exec rec of \$5M to support new and existing site infrastructure and development**
