

## What to do if you get a phishing email (real or drill) on your mobile device:

- Report it from your mobile device by clicking the three dots by the sender's name and selecting the **Report Phish** button. This button offers an easy way for you to forward suspicious emails to [spamspotting@houstonmethodist.org](mailto:spamspotting@houstonmethodist.org). It automatically deletes the email and sends it directly to our IT security team. You'll also receive an alert confirming receipt of your suspicious email.
