

Dispense Tracking Information on the MAR

Audience: Nursing

Access Rover medication dispense tracking events from the MAR in Epic. The example below uses Warfarin (COUMADIN) tablet 7.5 mg to show the dispensing events.

Rx Messages

1. Open the **MAR** in your patient's chart.
2. Open **Rx Messages** to view the message sent from Rover regarding Warfarin (COUMADIN) leaving the pharmacy.

The screenshot shows the Epic Medication Administration Record (MAR) interface. The 'Messages' tab is selected, displaying a 'Read Messages from Pharmacy' window. The window shows 'Recent dispensing events' for 'warfarin (COUMADIN) tablet 7.5 mg'. A message is visible with the action 'Left pharmacy via Out for Delivery' on '05/05 1035'. A red callout box points to this message with the text 'out for delivery'. The background MAR shows various medications, with 'warfarin (COUMADIN) tablet 7.5 mg' highlighted in red.

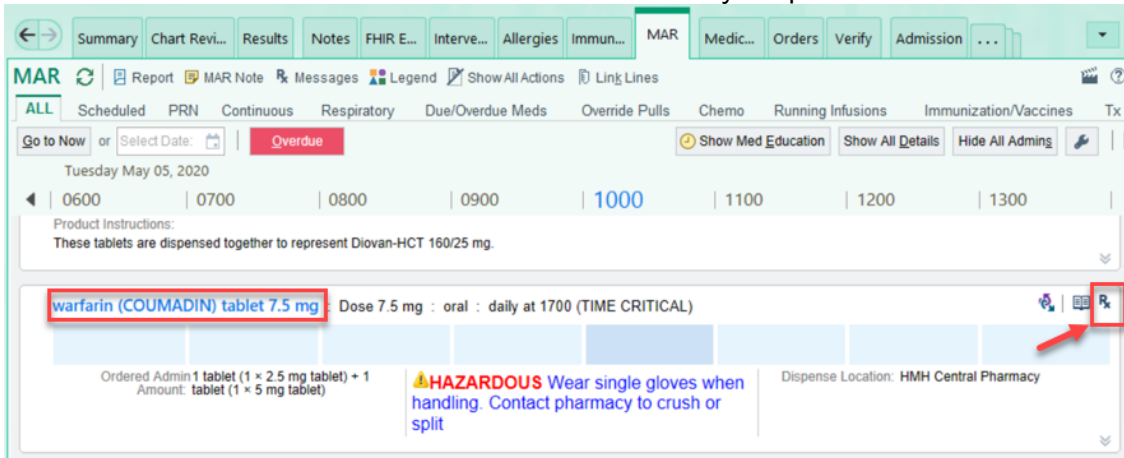

3. When the medication arrives at the unit, the tech marks the medication as **Received** and leaves a comment (if necessary) from Rover.
4. You'll see the following on the **MAR**.

The screenshot shows the Epic MAR interface with the 'Messages' tab selected. The 'Read Messages from Pharmacy' window is open, showing 'Recent dispensing events' for 'warfarin (COUMADIN) tablet 7.5 mg'. A message is visible with the action 'Received in HMH JONES 10' on '05/05 1042'. A red callout box points to this message with the text 'arrived in department'. The background MAR shows various medications, with 'warfarin (COUMADIN) tablet 7.5 mg' highlighted in red.
