Secure Chat – Chatting from Summary-Overview Report

Since Secure Chat's successful launch last week, nearly 12,000 messages have been exchanged. Secure Chat functionality includes the ability to start a chat with the treatment team while you're in the **Summary-Overview Report**.

Here's how to do this on Epic desktop/WOW and Haiku/Canto. This functionality isn't currently available for Rover.

- From Epic desktop/WOW. For details, please review this [tip sheet](#).
 - From **Summary**, click **Overview**.
 - In the **Treatment Team** section, click **Chat with All Active Members**.
 - Secure Chat then opens a new message with all active treatment team members in the **To** field.

- From Haiku/Canto. For details, please review this [tip sheet](#).
 - From the bottom of a patient's chart, tap to the right until you find the **Care Team** activity.
 - Tap **Care Team**.
 - From **Care Team**, you can start a new conversation with the attending provider or the patient care team.
