Insulin Corrective Scale Modified MAR Elements

Effective Monday, Aug. 17

Starting Monday, Aug. 17, the **Insulin Corrective Scale** will be modified to make it easier to distinguish between multiple **Corrective** scales and to access **Corrective** scales by hyperlink.

- **Insulin Corrective Scale** modifications include:
- The active **Corrective Scale** will now display only the hyperlink for the **Scale** currently ordered – not all three scales (**High**, **Medium** and **Low**).
- The hyperlink only applies to the current, active **Corrective Scale**.

insulin lispro (HUMALOG, ADMELOG) injection 0-12 Units : Dose 0-12 Units : subcutaneous : every 4 hours :

2027 Due

Admin Instructions:
