

## For All Nurses and Respiratory Therapists Using Rover

### Rover Zebra Smartphone: Quarterly Update

*Downtime Tuesday, June 23, 10 a.m. – noon*

The quarterly update for Rover Zebra smartphones is Tuesday, June 23, and includes a Rover and Workforce Connect (phone app) downtime from 10 a.m. – noon. However, your individual downtime will last **just five to 10 minutes during this timeframe**.

#### What to expect

- Make sure your phone is turned on.
- During your individual five to 10-minute downtime:
  - Rover will drop any work in progress, including medicine administration. When you log back in, Rover will inform you of incomplete work.
  - Use Epic on workstations for documentation.
  - You can still use your Zebra smartphone for calls.
- After the downtime, you'll need to reinstall the updated Rover app by tapping **Accept** for the **End User License Agreement** and logging in with your HM user ID and password.

#### New Rover features

- **Treatment Team** includes a **Secure Chat** dialogue bubble.

- Improved look for **Best Practice Advisories (BPAs)**.
- Automatically adds new flowsheet rows for more documentation details.

#### New Workforce Connect features

- Updated phone directories for several hospitals.
- **Stratus Language Line** added to the **Generic Roles** icon.
