DON'T MISS OUT!

On June 19th Monroe County will be getting all new flood maps once more. The new maps have a few surprises never seen before in Michigan. In some instances these new maps will be good news, however other instances the flood zones could be raising as much as 4 to 6 feet along the coastal regions on Lake Erie. In many instances previous Elevation Certificates and previous LOMA's will all be non-valid starting June 19th.
