# Tracy's Tech Tips

Have you tried Canva ?

- Like to post quotes with backgrounds on Facebook?
- Need a quick invitation?
- Want to add some text to your Instagram Picture?
- Need a quick poster?
- Create a fancy logo!
- Create a Facebook or Twitter cover!

These were all created with Canva!

I'm so excited to tell you about Canva.com! Canva.com is a <u>FREE resource</u> that lets you create great graphics and then save them or share them wherever you need it as a JPG, PNG or PDF. Canva was shared and presented at [Maryland Tech Connect 2016](#).

This graphic editor is simple and easy to use. WMRL has a special account that allows county staff who routinely create graphics to resize and share images simply. But the great thing about Canva is that anyone can create an account and use it for their own personal use. Social media is all about presentation and Canva lets you create simple yet great designs!
They also have an App that you can download & create great designs right from any mobile device!

Tracy Carroll, Web Services Specialist, Western Maryland Regional Library. Tracy is looking forward to spring and summer projects around the house like painting her kitchen cabinets white All helpers are welcome, pizza party will follow, lol.
