COVID-19 FAQ

What if a summer student or staff member learns they have a confirmed case of COVID-19?

The staff member or student should quarantine for a 2 week period before returning to 317 Main. 317 Main will also notify all students who were in contact with that individual while at 317 Main. Students/staff can return to class after they show proof of a negative COVID-19 test, or wait 2 weeks from the time they were in contact with the individual before returning to our campus. It's also possible that the class could switch to a remote learning platform during the two week period.

What if the family member of a student or staff member tests positive for COVID-19?

One of the reasons COVID 19 is so contagious is because the virus may be transmitted even when a person has no symptoms. Because of that, it's best to stay home if someone in the student or staff's household has the coronavirus infection, at least until all family members can take a COVID test.

What if someone answers "yes" to any of the screening questions?

They will not be able to participate in class that day.

What if someone doesn't want to wear a mask?

Masks are required to participate in classes at 317 Main. Some students find face shields to be more comfortable.

What If someone forgets their mask?

We'll give you a disposable mask.
