Family Fun Night

Join us on Saturday, February 4, 2017 for Foothills Academy's Family Fun Night - a fun night the whole family can enjoy together. All net proceeds from this event will be directed to the Foothills' bursary fund that helps all families access the programs and services Foothills Academy has to offer regardless of financial circumstances.

For this evening, guests will have full access to the entire TELUS Spark Science Centre facility. The event takes place from 6:30 pm to 10:00 pm. There will be a variety of activities to entertain everyone. In addition to all the regular Science Centre and Creative Kids Museum activities, there will be optional additional activities for all ages. There will be two dome show movies to choose from and the opportunity to go through the Star Trek: The Starfleet Academy exhibit on its opening day. We will be also offering face painting, some carnival-style games, family photo booth, opportunities to Spin to Win, bid on Silent Auction items and more!

Optional Activities

Star Trek: The Starfleet Academy Exhibit \$15 per person

Upon entering the exhibit, you'll become a Starfleet Academy cadet recruit. "Career Day" at the academy will test your knowledge and skills to discover what your true ranking might be as part of the crew of a starship. Will you be a Medical, Engineering or Science Officer? How about a Commander?

After a hologram orientation, you'll begin a series of simulated science, engineering, medical and command evaluations in nine different zones. As you progress through the training program, your results will be tracked with an individual wristband in order to determine your Starfleet career recommendation.

- Learn to speak Klingon
- Conduct a planetary survey
- Guide the U.S.S. Enterprise through a maze of threats
- Test your hand during phaser target practice

There's something for everyone at Star Trek: The Starfleet Academy Experience.

At the end of your training, you'll graduate and receive your commissioning in the Starfleet. Don't forget to step out onto the bridge of a Next Generation era bridge.

The unique blend of science and science fiction in Star Trek: The Starfleet Academy Experience makes it ideal for life-long and new Star Trek fans alike. Discover the science behind Star Trek and learn how STEM (Science, Technology, Engineering and Math) helped to create the world of Star Trek.

Moviedome: \$5 per person

Space Next 7 - 7:40 pm (Best for ages 6+)

The journey to reach the stars began with our earliest dreams of flying, and led to landing on the moon and sending a probe to Pluto. But, that's only the beginning.

Space Next offers a glimpse into tomorrow, and the possibilities of what is to come by way of private space developments and national space programs. The result is an immersive display of interplanetary excellence sure to inspire a generation of explorers, scientists, and dreamers. Come discover what's next.

Our Milky Way - A Live Planetarium Show 8 - 8:40 pm (Best for ages 8+)

Fly through our home Galaxy, the Milky Way, to explore stars, nebulae, supernovas and black holes! Join us for this live show, exclusive to TELUS Spark, as we travel hundreds of light years into deep space to see where stars are born, where they die, and to discover how they create the energy and elements that make all life possible (including you and me). The journey ends with a plunge into a black hole, so hold on tight!
