

# A Puzzling Case of Collusion....

**"we send the message that this is the law."** wrote Kathleen Toomey, MD PhD in her position as the Commissioner of the Georgia State Department of Public Health. She would go on to architect a fraudulent backstory created, for a board complaint, to get the doctors license revoked. All the while the participants were also aware of another conclusion by DPH,,,, "there is nothing we can do leagally..... He has done nothing wrong...."

Yet, the DPH conspirators began their work ***as instructed*** by Dr. Toomey on Nov 13, 2019! While the doctor remained unawares.

An alarming series of events then unfolded within the Georgia State Department of Public Health and in collusion with the GA-AAP. The violations of law and potential abuses of power threaten the integrity of our healthcare system. At the heart of this controversy is Dr. Kathleen Toomey, orchestrated a campaign to unjustly revoke a physician's license, leveraging her position to enforce authority beyond legal bounds.

This is not just about one individual but highlights systemic issues that could affect us all. The evidence, laid out in chronological order, chronicles a disturbing tale of collusion, deceit, and harassment that undermines the core values of justice and transparency.

It seems clear from just a review of timeline events as Dr. Toomey plan evolved. You can read the frustration as "Team Corruption" found ways to bypass bothersome facts they themselves had concluded:

- "he has done nothing wrong"
  "there is nothing we can do legally"

They had no legal options against the good doctor. So Dr. Toomey implemented the opotions she did have. The illegal ones. Dr. Toomey was going to have the doctors license revoked come hell or the high water....

Now every member involved in her conspiracy knew it was baseless, yet obeyed Dr. Toomey malignant instructions.

**Background:**

In the days before this email a case of measles was suspected at the doctor's practice. It was properly reported and the practice went above and beyond to assist DPH in their contact tracing efforts. The DPH team "thanked both the doctor and his staff several times during DPH investigation. Not a single concern was raised that was not immediately resolved by the good doctor. Despite this being a undisputed fact; the following unfolded:

**Nov 9, 2019 Email to the doctor/practice**

"Thank you **again** for providing the contact information
so quickly for the high-risk patients."
