

PAPERS IN ROA

Brought to you by **BioTools, Inc.**
Empowering Characterization

**MAY
2025**

BioTools, Inc | 5730 Corporate Way, Ste. 220, West Palm Beach,
FL 33407 | 561-625-0133 | info@biotools.us | biotools.us

1. **Raman optical activity enhanced via supramolecular aggregation and other intermolecular interactions—A review.**
Pajor, K., Halat, M., Rode, J. E., & Baranska, M. (2025). *Chemistry – A European Journal*, 31(24), e202500394. <https://doi.org/10.1002/chem.202500394>
2. **Bisignate surface-enhanced Raman optical activity with analyte-capped colloids.**
Das, M., Gangopadhyay, D., Andrushchenko, V., Kapitán, J., & Bouř, P. (2025). *ACS Nano*, 19(10), 10412–10420. <https://doi.org/10.1021/acsnano.4c19027>
3. **Chiroptical signature and absolute configuration of Tröger's base-based triangular macrocycles.**
Palomo, L., Cruz, C. M., Campaña, A. G., Jiang, B., Wu, J., Casado, J., & Ramírez, F. J. (2025). *ACS Omega*, 10(7), 6419–6426. <https://doi.org/10.1021/acsomega.4c06384>
4. **Chiral correlated-plasmons enhanced Raman optical activity from spin-polarized, correlated s band in highly oriented single-crystalline gold quantum-dots.**
Ho, S., Ong, B. L., Naradipa, M. A., Fauzi, A. D., Ali, M. S. B. M., Tok, E. S., & Rusydi, A. (2025). *Applied Physics Letters*, 126(3), 031902. <https://doi.org/10.1063/5.0239918>
5. **Raman, ROA, and luminescence spectra of chiral lanthanide complexes with L- and D-alanine.**
Machalska, E., Lyczko, K., Rode, J. E., Dybas, J., Palys, B., & Dobrowolski, J. C. (2025). *Spectrochimica Acta Part A: Molecular and Biomolecular Spectroscopy*, 330, 125713. <https://doi.org/10.1016/j.saa.2025.125713>
6. **Raman spectroscopic technologies for chiral discrimination: Current status and new frontiers.**
Tian, Y., Fang, G., Wu, F., Kauno, J. G., Wei, H., Hsu, H.-Y., Li, F., Xu, G., & Niu, W. (2025). *Coordination Chemistry Reviews*, 526, 216375. <https://doi.org/10.1016/j.ccr.2024.216375>
7. **A novel incident circular polarized light Raman optical activity (ICP-ROA) spectrometer with advanced polarization control.**
Hofmann, K., Martin, L., & Fischer, I. (2025). *Journal of Raman Spectroscopy*, 56(1), 32–39. <https://doi.org/10.1002/jrs.6733>
8. **Glutathione and its structural modifications recognized by Raman optical activity and circularly polarized luminescence.**
Domagała, A., Buda, S., Barańska, M., & Zając, G. (2025). *Spectrochimica Acta Part A: Molecular and Biomolecular Spectroscopy*, 324, 124995. <https://doi.org/10.1016/j.saa.2024.124995>

9. **Proline, a unique amino acid whose polymer, polyproline II helix, and its analogs are involved in many biological processes: A review.**
Umumararungu, T., Gahamanyi, N., Mukiza, J., Habarurema, G., Katandula, J., Rugamba, A., & Kagisha, V. (2024). *Amino Acids*, 56(1), 50.
<https://doi.org/10.1007/s00726-024-03410-9>
10. **Phosphorylation site of L-alanyl-L-glutamine identified by Raman optical activity spectroscopy.**
Wu, T., Kessler, J., Zhao, H., & Zhao, Y. (2024). *Spectrochimica Acta Part A: Molecular and Biomolecular Spectroscopy*, 320, 124587. <https://doi.org/10.1016/j.saa.2024.124587>
11. **(Resonance) Raman optical activity among chiroptical spectroscopies: Quo vadis.**
Halat, M., Pajor, K., Baranski, R., & Baranska, M. (2024). *Journal of Raman Spectroscopy*, 55(5), 539–548. <https://doi.org/10.1002/jrs.6650>
12. **Induced chirality in canthaxanthin aggregates reveals multiple levels of supramolecular organization.**
Halat, M., Zajac, G., Andrushchenko, V., Bour, P., Baranski, R., Pajor, K., & Baranska, M. (2024). *Angewandte Chemie International Edition*, 63(21), e202402449.
