Go WILD for Math!

3rd Grade Summer Math Program at Bassett Elementary

Welcome to the Third Grade 2018 Summer Math Program at Bassett! As you complete the Summer Reading Program, you can also complete our Summer Math Program by exploring eight different animals that can be found living in the rainforest. To complete the math program, you need to do 10 minutes of math 3 times each week for 8 weeks of the summer. Complete each 10 minutes of math and make a check mark in the table. At the end of the week, color in the animal for that week. Color in all eight animals to complete the program.

Keep this sheet in a safe place throughout the summer, and bring it to Bassett during the first week of school. All students who complete the Summer Math Program will be recognized at an awards ceremony and will receive a small prize.

All forms are due by Friday, August 24, 2018.

<u>Week 1</u> 				<u>Week 5</u> 			
<u>Week 2</u> 				<u>Week 6</u> 			
<u>Week 3</u> 				<u>Week 7</u> 			
<u>Week 4</u> 				<u>Week 8</u> 			

GOALS FOR THIRD GRADERS AT BASSETT:

- Students entering 3rd grade are expected to have mastered addition & subtraction facts (1-10). Those students who have met this goal are able to grasp the 3rd grade multiplication skills and apply them right away in the fall.
- 3rd graders will be tested on ADDITION facts at the END of the FIRST quarter and SUBTRACTION facts at the END of the SECOND quarter of the year. Mastery of these facts is to be practiced at home.
- Mastery of MULTIPLICATION FACTS (1-10) will begin with our first math unit, Understanding Equal Groups starting in September. Each student will begin the year with practicing their 2's & 3's in their HW packets and progress at an individual rate based on their rate of mastery.
- 5 minute fact tests in multiplication (then division) will be given each quarter for students to master 100 facts with 95% accuracy in 5 minutes or less.
- Studying division facts will help build up multiplication mastery.
- By the end of 3rd grade, mastery of BOTH multiplication & division is expected.

SOME WEBSITES TO CHECK OUT FOR PRACTICE IDEAS:

- www.math-drills.com: This site has printable math worksheets that you can use for "Fast 50" practice.
- www.khanacademy.org: Helpful website for math, as well as other subjects.
- www.factmonster.com: Helpful for math and other subjects AND tablet and smartphone compatible.
- www.mobymax.com/signin: You will continue to have access to MobyMax over the summer!
