

## **Connect to Local Talent**

**By Amy Donahoe**

**Director of Workforce Development**

If you're looking for talent (who isn't right now??), don't forget our Springfield City and Clark County High Schools where many students are engaging in an aptitude platform known as **YouScience**. Now, for the first time, companies are being permitted to register on the YouScience system, making their company more visible to local students. That's why The Greater Springfield Partnership has partnered with YouScience to support the launch of Talent Marketplace –a platform to assist local talent to become aware and better understand the businesses in our community.

### **How does it work?**

Local employers enter company information and indicate the skills desired from potential employees. Using a proprietary algorithm that matches the individuals talents and skills, YouScience identifies individuals that are well suited to an employer's needs. Qualified candidates are aligned to suitable employer opportunities in the Talent marketplace.

**How does YouScience connect to [www.ClarkCounty.jobs](http://www.ClarkCounty.jobs)?**

We have several IT goo-roos working behind the scenes to help make YouScience a big part of our newly launched local job search site! Be sure to post all your local job opportunities on [www.ohiomeansjobs.com](http://www.ohiomeansjobs.com) so they will also appear on the NEW [clarkcounty.jobs](http://clarkcounty.jobs) website!

### **Are you ready to find your future workforce?**

The attached brochure will get you started. [Click here to view the brochure.](#)

Please also reach out to me on other new ways to connect with our area high schools this upcoming academic year!
