Are you a coder, technical writer, or project manager? Have a desire to work internationally? Use your skills to collaborate with fellow students and young professionals in Iraq, the Palestinian Territories, and the U.S., and create solutions for their countries’ greatest challenges.

The NextGen Coders Network (NGCN) is a 10-week online experience by World Learning. From September 14, 2020 through November 20, 2020, join an international project team made of students and professionals from Iraq, Palestine, and the U.S. solving global problems using code, technical writing, project management and design thinking. You may be able to use this experience for a class project, honors credit, internship credit, or an independent study.
