

2021 PBA Marketplace COVID SAFETY PROTOCOLS

- Ultra Violet Germicidal Irradiation (UVGI) units are installed into the HVAC systems in York Expo's (Weis Market) Arena. This system kills harmful bacteria with a UV light when they are passed in front of the light through the HVAC units.
- Touchless sink faucets and touchless flush valves are installed in the York Expo's (Weis Market) Arena and Memorial Hall East/West.
- A few automatic doors will be installed at the York Expo's (Weis Market) Arena to allow for no - touch entry and exit.
- 24 new automatic hand sanitizer dispensers and low adhesive floor decals for social distance spacing and arrows for one-way foot traffic.
- Utilization of new sanitizing floor scrubbers for both buildings and six electrostatic disinfecting units that can sanitize a room with ease.
- Face masks are required when inside the buildings.
- Only two-representatives in a booth. We are not allowing a 3rd person for this event.
