

## Mission Moment

Creative partnerships at Gonzaga Family Haven are the hallmark of our community. A creative Sports Outreach program created by Gonzaga's professor Jimmy Smith is a great example of the work (and fun) happening on site. GU students earn college credit to learn about childhood ACES and create programming to engage students throughout the semester. This semester we had over 31 GFH children participate two days a week. The GFH children get excellent role models, and the GU students learn how to serve and be engaged with children who need them most.
