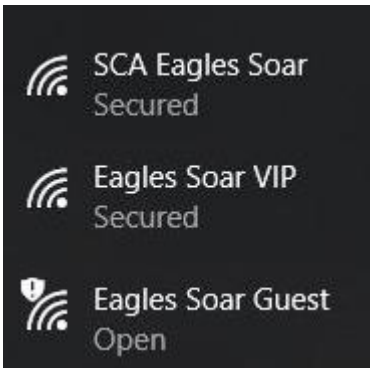
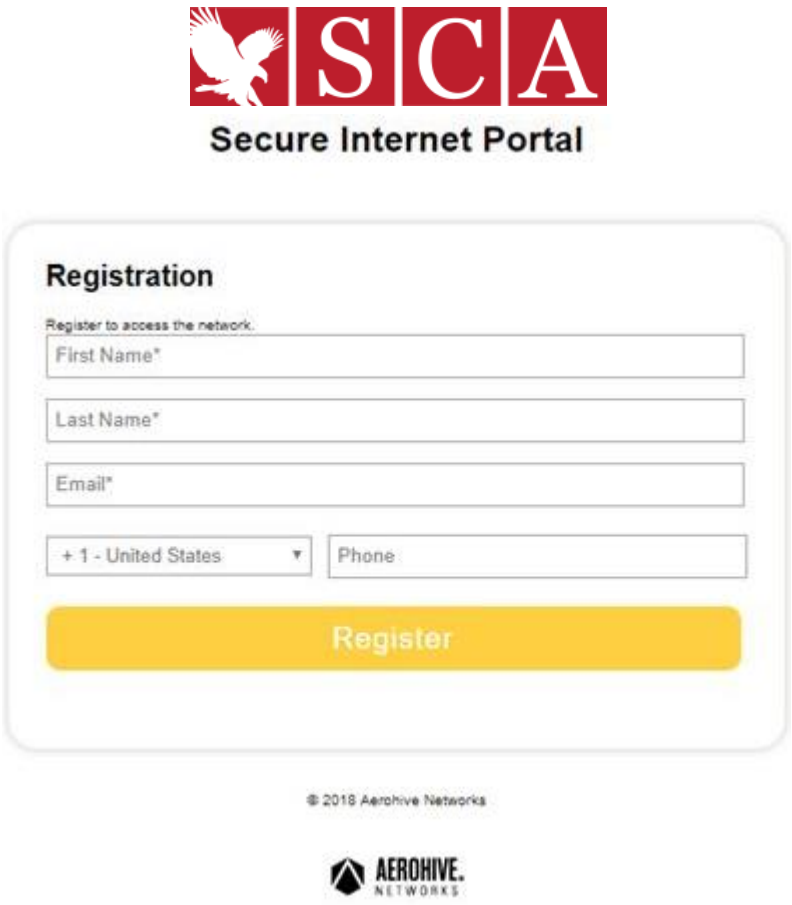
The goal is to provide honored guests with access to our campus WiFi in a safe and accountable nature, please use the following procedures to connect your laptops, tablets, or mobile devices.



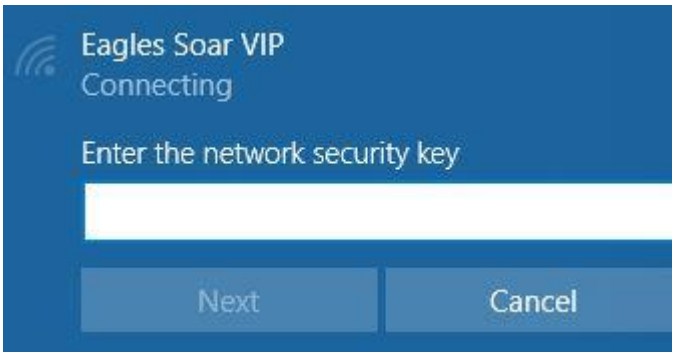
Step 1: connect to the Eagles Soar Guest network. This will prompt your device to use the sign on page. If this does not appear in your devices notifications, please open a web browser and attempt to go to any site. You should see the login screen below:



Step 2: fill in the registration form. We do require your name and email and optionally a phone number. This is to provide accountability while on our network. Once you fill in this information and click register, you will receive an email and/or a SMS message with your login information for step 3.

Step 3: Receive your welcome message either by email or SMS. Copy the access key to your device's clipboard to use to connect to the Eagles Soar VIP SSID in step 4:

Step 4: disconnect from the Eagles Soar Guest network, and connect to the secured Eagles Soar VIP network and use the access key from your welcome message. Depending on your device's wireless setup, if you had previously logged in and the enter security key does not appear, you may have to 'forget' the Eagles Soar VIP network to wipe out previous logins so you can enter the current access key. This key will expire 9 hours after first use and you will have to repeat the sign in process.



When you try to connect to the Eagles Soar VIP AFTER your 9 hour access key has expired, you will need to connect to the Eagles Soar Guest network again to make the sign in process pop back up on your device.
