

CROSBY ROV RELEASE & RETRIEVE SHACKLE

WITH PATENT PENDING CAPTURED BOLT DESIGN

The New Crosby Release and Retrieve shackles were developed in conjunction with the world's top subsea specialists. Crosby ROV shackles feature an innovative patent pending captured bolt design, and API compliant features that are an industry first. Best of all, the shackles come factory ready and require no end user modification.

Features

- Forged alloy bow with an *industry best* 6 to 1 performance design factor
- Patent pending captured bolt can withstand approximately 2,000 lbs. (907 kg) of pull-out force
- Galvanized bow with an API RP 17H color compliant coating
- Galvanized alloy bolt comes in either QUIC-Thread or non-thread design
- On average, QUIC-Thread bolt requires only 3.5 rotations for full engagement
- API RP 17H compliant 316 stainless steel handles available in T, D, F, and Eye models (sold separately)
- Built in eyelets for optional tether points
- Monkey fist(s) included

Job Site Tough

- Meets or exceeds all industry standards
- Tested and approved by subsea professionals

Flexibility

- Available in QUIC-Thread or non-threaded bolt design
- Modular API RP 17H compliant 316 stainless steel handles available in T, D, F, or Eye models (sold separately)

Saves Time, Money and Reduces Liability

- Lock plate with tether point for enhanced bolt securement
- User friendly design, fastest, most reliable ROV shackle on the market
- Factory ready design requires no end user modifications
