

My name is Kristian Natalie Artola Miranda, I am 13 years old, I am currently in my second year of secondary education at the Centro Academia Cristiana Ciudad Darío.

I consider myself to be friendly, loving, respectful, honest, sincere, responsible and obedient.

I live in the José Cuadra neighborhood of the Ciudad Darío municipality, the distance to attend my school is approximately half an hour, and I walk to school, since I like to enjoy the morning weather.

Three people live in my house, my father: Franklin Antonio Artola Reyes, he works at the MTI in Managua- as a land transport controller, his monthly income is C$ 4,200.00, my mother: Jasmina José Miranda Saballos, is a housewife, and me: Kristian Natalie Artola Miranda.

Both of my parents went to university but could not finish their degrees. My father reached the 3rd year of Law and my mother the 4th year of the same degree.

I visit the Christian Church, La Roca and I want to share this little message: The world would be better if more people looked for the Living God, the God of the covenant, the God who, when he left us, left us his son Jesus and his Holy Spirit.

I have been part of the Educational Advancement Program for 8 years now, and I believe that SOL has trained me in in many skills, abilities, and knowledge, which I am able to put into practice in my studies. I like the subject of Natural Sciences because I like to know how the world around us works.

One of my favorite hobbies is doing Tik Tok since I like to have fun and share them with my friends. One of the skills I practice in my spare time is drawing and I really enjoy it. Currently I belong to the Dance Group, Brillo de SOL, since I love to dance and share with my friends and teacher. I like to go out with the group to make presentations in different places. I have also learned other skills in the different courses at the SOL Learning Center, such as the marimba, recorder, drawing and crafts. I like to attend the SOL Learning Center to play, help and interact with children in need.

I would like to continue studying because I want to finish my high school studies and be a professional, study the Career of Pediatrics to provide medical care to children.

I thank the donors for giving me the opportunity to be part of the Educational Advancement Program during these last 8 years, thanks to SOL for providing me with a better education, learning and a better future!
